XXXXX"As the only one of its type, this program [or system outlined in this book] offers a complete, practical, easy-to-use system that you can use to measure a person's thoughts and feelings quickly, at any time."The above quotation is found in the introduction of this fascinating book by Dr. David J. Lieberman, author and "internationally recognized leader" of human behavior and interpersonal relationships.Be aware that the system in this book is not about reading someone based on their

body language, their speech pattern, or how they dress. It is not about developing some mystical power such as telepathy. Instead, this book contains specific and proven psychological techniques that can be instantly applied to any person in almost any situation. Is this system absolutely foolproof? Of course not. No system is. But you will gain a "statistical advantage" to reading a person by using the methods in this book. The book itself is divided into two sections: Section one (7 chapters) has techniques that will give you much insight into people, and will help you gain the advantage in practically every situation. Each chapter in this section is based on seven basic questions. These questions are as follows: (1) Is this person hiding anything? (2) Does the person like or not like someone or something? (3) Is the person really confident or just attempting to play it cool? (4) How is a person really feeling? (5) Is the person really interested or are you just wasting your time? (6) Whose side is a person really on? (7) How safe, stable, and sane is a person...really?
