Mathematical Discovery On Understanding, Learning, And Teaching Problem Solving, Volume II

Synopsis

“Solving problems”, writes Polya, “is a practical art, like swimming, or skiing, or playing the piano: You can learn it only by imitation and practice. This book cannot offer you a magic key that opens all the doors and solves all the problems, but it offers you good examples for imitation and many opportunities for practice: If you wish to learn swimming you have to go into the water and if you wish to become a problem solver you have to solve problems.” In enough cases to allay ... discouragement over not immediately discovering a solution, Professor Polya masterfully leads the reader down several unproductive paths. At the end of each chapter he provides examples for the reader to solve. By means of these carefully selected and arranged problems, many of them directly related to others that precede, and guided by just the right suggestions at just the proper time, the reader's own ability is developed and extended. Solutions to the examples and, in many cases, outlines of procedures for discovering solutions, are given at the back of the book. With striking promise for effectiveness, the entire book as a unit is one great experience in learning processes for problem solving through participation. The author has captured with great success the implication of his basic premise stated in the preface ... • The Mathematics Teacher 218 pages.

Book Information

Paperback: 218 pages

Publisher: Ishi Press (July 7, 2009)

Language: English

ISBN-10: 4871878325

ISBN-13: 978-4871878326

Product Dimensions: 6 x 0.5 x 9 inches

Shipping Weight: 13.8 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars • See all reviews • (1 customer review)

Best Sellers Rank: #186,906 in Books (See Top 100 in Books) #22 in Books > Science & Math > Mathematics > Geometry & Topology > Analytic Geometry #23 in Books > Science & Math > Mathematics > Geometry & Topology > Algebraic Geometry #713 in Books > Business & Money > Management & Leadership > Decision-Making & Problem Solving

Customer Reviews

Now the first part was mostly about list of heuristics. I know that G. Polya realised that it is not just enough to know heuristics to become a good problem solver. You need something else. It doesn't appear that he made a lot of progress on that but he has done a great job of putting it down in paper

as to what he thinks about the psychology of problem solving. I highly recommend this book to kids preparing for the International Math Olympiad and other tough Math contests. Please also look at Mathematical Problem Solving by Alan Schoenfeld which is probably a good continuation of the work that has been presented in this book and is much more useful than this book.

Mathematical Discovery on Understanding, Learning, and Teaching Problem Solving, Volume II
Learning: 25 Learning Techniques for Accelerated Learning - Learn Faster by 300%! (Learning, Memory Techniques, Accelerated Learning, Memory, E Learning, ... Learning Techniques, Exam Preparation)
The Mathematical Olympiad Handbook: An Introduction to Problem Solving Based on the First 32 British Mathematical Olympiads 1965-1996 (Oxford Science Publications)
Knowing and Teaching Elementary Mathematics: Teachers' Understanding of Fundamental Mathematics in China and the United States (Studies in Mathematical Thinking and Learning Series)
Algebraic Geometry: A Problem Solving Approach (Student Mathematical Library)
Learn: Cognitive Psychology - How to Learn, Any Skill or Subject in 21 Days! (Learn, Learning Disability, Learning Games, Learning Techniques, Learning ... Learning, Cognitive Science, Study)
Swift Artificial Intelligence: Made Easy, w/ Essential Programming; Learn to Create your * Problem Solving * Algorithms! TODAY! w/ Machine Learning & Data Structures (Artificial Intelligence Series)
Understanding Bergson, Understanding Modernism (Understanding Philosophy, Understanding Modernism)
Reflexes, Learning And Behavior: A Window into the Child's Mind : A Non-Invasive Approach to Solving Learning & Behavior Problems
Guide to Law and Literature for Teachers, Students, and Researchers: Companion Text to Literature and Legal Problem Solving : Law and Literature As Ethical Discourse
Data Abstraction and Problem Solving with Java: Walls and Mirrors
Community Policing and Problem Solving: Strategies and Practices (6th Edition)
Geometry by Construction: Object Creation and Problem-solving in Euclidean and Non-Euclidean Geometries
Problem Solving, Abstraction, and Design using C++ (6th Edition)
Mathcad: A Tool for Engineering Problem Solving + CD ROM to accompany Mathcad (Basic Engineering Series and Tools)
Data Structures and Problem Solving Using Java (4th Edition)
Data Structures and Problem Solving Using Java (3rd Edition)
Principles of Program Design: Problem-Solving with JavaScript (Logic and Design)
Java: An Introduction to Problem Solving and Programming (7th Edition)
Problem Solving and Program Design in C (8th Edition)
